

Google Web Toolkit (GWT) is a development toolkit for building and optimizing complex browser-based applications. GWT is used by many products at Google, including Google AdWords and Orkut.

GWT is open source, completely free, and used by thousands of developers around the world. It is licensed under the Apache License version 2.0.

This tutorial will give you great understanding on GWT concepts needed to get a web application up and running.

## AUDIENCE

---

This tutorial is designed for Software Professionals who are willing to learn GWT Programming in simple and easy steps. This tutorial will give you great understanding on GWT Programming concepts and after completing this tutorial you will be at intermediate level of expertise from where you can take yourself at higher level of expertise.

## PREREQUISITES

---

Before proceeding with this tutorial you should have a basic understanding of Java programming language, text editor and execution of programs etc. Because we are going to develop web based applications using GWT, so it will be good if you have understanding on other web technologies like, HTML, CSS, AJAX etc.

### 1 - GWT Quick Reference Guide

A quick reference guide for GWT Programmers.
